

What we do

- **Engineering, Procurement & Project Management:**
 - Oil & Gas, Mining, Industrial and Utilities, etc.
 - Naval Architecture
 - Renewables
- **Maintenance Services:**
 - Repair & Overhauls
 - Condition Monitoring
 - Asset Management
- **Packaged Equipment:**
 - Power Generation
 - Pump & Compressor Skids
 - Vessels
- **Manufacturing:**
 - Bespoke Pumps
 - Metal 3-D Printing
 - CAD/CAM
- **Equipment:**
 - CNC Manufacturing Machinery
 - Inspection (Nikon & LK Metrology)
 - Laser Products

EDgineering

PROJECTS, BESPOKE EQUIPMENT & MAINTENANCE SERVICES

Our People Are Our Most Important Asset.

Our Services

Efficiency and Innovation; achieving the cutting Edge in Engineering

Engineering Services

Process Optimization

FEED & Detailed Design

Feasibility Studies

Project Management

Construction Management & Cost Control

Maintenance

Rotating Equipment

Asset Integrity

RBI (Risk Based Inspection)

Preventive Maintenance

RAM Analysis (*Reliability, Availability and Maintainability*)

RCA (*Root Cause Analysis*) Investigations of Failures

Performance Monitoring

Vibration Analysis

Oil Analysis

Procurement

Custom-made Machinery/Skids

Engineering

Optimized, Environmentally Friendly, Energy Saving Solutions for Complex Processes & Industries.

Maintenance

Precision and Accuracy in Repairs, Excellence in Commissioning and Performance Monitoring.

Project Management

Project Management and Execution with Efficiency and Cost Control leading to Smooth Commissioning, Start-up and Handover.

Customer Engagement

Customer engagement is about encouraging our customers to interact and share in the experiences we create for them as a business and a brand. EDgineering establish well, strong customer engagement strategy that will foster brand growth and loyalty.

EDgineering focus on value creation, not revenue extraction.

We know how to engage our customers by providing them with real value whether it be through an exceptional end-to-end customer experience, great content or strong customer support that are about delivering more than the traditional service.

The background of our people in the operations and maintenance of large scale operators, give us the advantage to provide superior service and an easy integration.

We Focus on What We Do Best

CORE VALUES:

- Efficiency
- Reliability
- Quality
- Commitment to Clients
- Safety Comes First
- Continuous Improvement
- Providing Training, Opportunities, Encouragement and Motivation to Our Employees

Health, Safety and Environmental

- EDgineering are committed to achieving zero harm to people and assets, and zero environmental incidents.
- Our integrity framework establishes the company expectations for progressing us towards this zero-harm vision and it applies to all of our people, contractors, products and services.

Packaged Equipment

Power Generation

CAT Generators

Standard & Custom Gensets

Hybrid (Diesel/Solar)

Industrial Skids

Pumps, Compressors, Fuel, etc.

Pressure and Vacuum Vessels

Water & Fluid Handling

Manufacturing

Bespoke Design

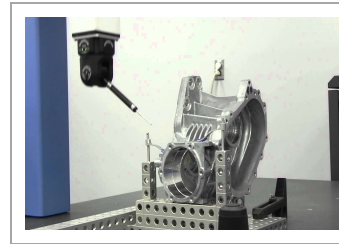

Metal Fabrication

Bespoke Special Application Pumps

Boats & Vessels

Manufacturing Machinery

Metrology

Nikon & LK Metrology

LK CMM & Nikon Laser Scanners &
Optical Measurement Systems.

X-Ray & Computed Tomography

Manufacturing Machinery

ONA / Spinner / Takisawa

3 and 5 Axis Machining Centers

Lathes

EDM (Die-Sink / Wire-Cut / Hole Drilling)

Lasers

Coherent - Rofin - OR Laser

Laser Welding Machines

Metal 3D Printing (*ORLAS Creator*)

Laser Cutting

Coating and Engraving
